

OLUWAKEMI A. ELEGAH

SENIOR BUSINESS ANALYST | PRODUCT OWNER | DIGITAL TRANSFORMATION

Leeds, United Kingdom 07765 525053 kemielegah@gmail.com

SUMMARY

Senior Business Analyst with 10+ years' experience delivering business change, digital transformation and product initiatives across Financial Services, HR Technology and Education. Experienced in Business Analysis, Product Ownership, Process Improvement and Data Analytics, with a track record of delivering customer-focused solutions that improve operational performance, drive adoption and support business growth. Skilled at translating complex business challenges into practical, technology-enabled solutions through effective stakeholder engagement, data-driven decision-making and cross-functional collaboration.

WORK EXPERIENCE

Senior Business Analyst

AdviserPlus Business Solutions Ltd

February, 2022 – Present

- Delivered the Business Hierarchy Filtering feature to be used by HR managers and senior management, enabling users to filter cases using client-specific business hierarchies across organisational structures.
- Delivered an internal team dashboard that improved visibility of tasks to improve operational performance and contributed to 99% SLA compliance.
- Leveraged Power BI and PostHog analytics to identify user behaviour trends and inform product decisions, helping prioritise enhancements that improved user engagement and adoption.
- Led stakeholder readiness activities for new feature releases, delivering demonstrations, training support and customer communications to drive successful adoption
- Led discovery and requirements definition for a self-service user management solution, working closely with product design, support and business stakeholders to enable client self-service administration of users and permissions, reducing dependency on support teams and supporting a projected 50% improvement in operational efficiency.

Business Analyst / Product Owner

Venture Garden Group

April, 2020 – February, 2022

- Led product planning and business analysis activities across five digital education platforms, owning product roadmaps, backlog prioritisation and requirements definition to support product growth and strategic business objectives.
- Collaborated with internal and external stakeholders to shape product requirements and implement data-informed user experience enhancements, increasing platform adoption by 25%.
- Defined product vision, roadmaps and backlog priorities across multiple education platforms, aligning delivery with strategic business objectives and supporting product growth and adoption.
- Leveraged user behaviour and performance data to guide product decisions and feature development, contributing to the successful launch of a student financing platform that increased student retention by 15%
- Facilitated cross-functional workshops and agile ceremonies, aligning stakeholders, product and engineering teams around shared priorities, reducing delivery ambiguity and supporting the successful implementation of new features and enhancements.

Business Analyst

Leadway Pensure PFA

June, 2012 – March, 2020

- Led an end-to-end review of the fund management process, mapping workflows, identifying bottlenecks and implementing process improvements that increased operational efficiency by 30% and improved the transfer of pension payment data to the investment team.
 - Led requirements and delivery activities for business system enhancements, including the implementation of a document management system, working with vendors and technology teams to improve operational efficiency, pension administration, and regulatory reporting capabilities.
 - Led UAT planning and coordination, including test execution support, defect management and stakeholder sign-off.
 - Delivered the organisation's first mobile application, transforming how pension members applied for and accessed their benefits, reducing processing times by 40% and improving the overall customer experience.
 - Led process review and documentation initiatives across multiple departments, creating standard operating procedures (SOPs) that improved process standardisation, operational efficiency and compliance within a regulated pensions environment.
